

CSC/MAT-220: Discrete Structures

EFY 11

Thomas R. Cameron

Due: November 3, 2017

Puzzle of the Week. Dr. Irl Bivens is swimming across Lake Norman (the long way). He averages 30 mph (not a typo, Dr. Bivens is a great swimmer) going one way. How fast must he go on the way back in order to average 60 mph for the entire trip?
