

MAT – 112: Calculus I and Modeling

Review 2 and Final Project

Instructor: Thomas R. Cameron

April 4, 2018

Instructions

This handout is intended to prepare you for the upcoming final project.

Review 2. The final project will be graded as follows:

- (6 pts.) You must select a group of three to at most 4 people, a topic, and date you will present. Inform me of your choice via email by Wednesday, April 18. You will be deducted 1 pt for each day past 4/18 for which you don't inform me of your choices.
- (15 pts.) Your research must include at least 3 sources, one of which must be a book outside of your textbook.

-

Topic Requirements. You must pick a topic that relates to our course and hopefully connects our course material with something else you are interested in and passionate about. Potential topics are listed below.

- Any of the material from Sections 9.1 – 9.5, 13.1 – 13.3, and 14.1 – 14.3.
- Any applications of the material we covered to the life or physical sciences (e.g. see the Extended Applications at the end of each chapter).
- Any other topic of your choosing, with my approval.
